

Structural & Engineering Geology

- Karst (sinkhole) Investigation and Evaluation
- Sinkhole Mitigation & Remediation Design
- Grouting programs
- Geomorphology/Fluvial evaluations & studies
- Aerial Photograph/Remote Sensing Evaluation for geological hazards (landslides, rock slope stability, sinkholes)
- Reservoir Dam and Earthen Embankment Stability Evaluation
- Geology & Hydrogeology support for geotechnical engineering and foundation studies
- Rock and Soil Slope stability evaluation
- Deep and Strip mine Evaluations
